PSYCHOMETRIC ASSESSMENT SERVICES

1 PRE-ASSESSMENT

Kids Are Kids! will provide an initial consultation with the parents/ carers to gather your child's background information including developmental history, previous assessments and to explore current concerns. The psychologist will help guide you to the most appropriate assessment/s to fit with the needs of your child.

2 COGNITIVE ASSESSMENTS (6-16 YEARS)

A cognitive assessment (IQ test) will help you gain a greater understanding of your child's capacity to learn, as well as their cognitive strengths and weaknesses. The Weschler Intelligence Scale for Children (WISC-V) provides an overall profile of your child's verbal skills, non-verbal problem solving skills, visual spatial skills, working memory and processing speed.

3 ADAPTIVE BEHAVIOUR ASSESSMENTS

If needed, further assessment of adaptive behaviour (everyday living skills) can be completed to determine if your child meets the DSM-V diagnostic criteria for an intellectual disability together with the results on the WISC-V.

4 WRITTEN REPORT AND FEEDBACK

You will receive a written report including recommendations to support your child's learning and development and a 30 minute feedback session in person or via phone to discuss results and recommendations.
